## neo-angin<sup>®</sup> dolo lozenges: NOW in orange flavour

Basel, 19 October 2021. neo-angin<sup>®</sup> dolo lozenges, now in fruity orange flavour – relief for acute symptoms and clear indications of severe, painful inflammation and redness in the throat area.

### neo-angin<sup>®</sup> dolo actively combats painful inflammations and alleviates burning throat pain.

Always inconvenient and troublesome, a sore throat makes you feel unwell without actually being sick – in this situation, family life can quickly become a challenge. For the most part, sore throats are caused by inflammations. Where inflammations are mild, locally active drugs are sufficient to alleviate the symptoms (e.g. the popular neo-angin<sup>®</sup> throat lozenges). If throat pains are acute and burning, neo-angin<sup>®</sup> dolo products are the better option. neo-angin<sup>®</sup> dolo lozenges now also come in orange flavour. Combinations of the two product lines are also conceivable.

### Flurbiprofen - an impressive substance

The active ingredient in both the new neo-angin® dolo orange lozenges and the cherry-flavoured dolo spray is flurbiprofen. Sore throat remedies containing flurbiprofen are recommended for burning throat pain combined with acute inflammation. Symptoms of an inflammation include swelling, redness and excessive heat.

### Burning throat? neo-angin® dolo helps!

Thanks to its effective anti-inflammatory action, neo-angin® dolo reduces pain, fever and swelling. Swelling in the throat area is particularly irritating, causing additional pain when swallowing and making it difficult to eat. For adults and adolescents from age 12.

### The new neo-angin® dolo range

neo-angin® dolo lozenges  
with orange flavour
